

# PANDELIS KONDOS

Graduate of Di

UI/UX Engineer

Web Developer

## PROFILE

*After graduating from university and completing my obligatory term in the Greek Navy I decided to start a postgraduate degree in economics in OPA university. Although I successfully completed some courses, I was not able to keep up with the very advanced rest of the courses and I was not able to complete the degree. So I aspire to land my first web development job.*

## EXPERIENCE

*I think for an entry level level job that I aspire to land my vanilla CSS skills are pretty advanced. I would say that my JS skills are pretty advanced as well.*

*I would rank my React skills as moderate since my project experience is limited.*

*My familiarity with PHP is pretty minimal although I have started working on a quite big project(news site), but since I do not think that it is possible to land a backend developer job as a junior developer I have stopped working on this project for the time being,although I intend to finish it in the future.*

*My familiarity with SQL I would say is pretty high, although this is not a skill required for a frontend developer.*

*My familiarity with MongoDB is not as high as my SQL familiarity, but with a touch up I would say I am pretty competent.*

*I am quite familiar with Figma both as a designer and as a developer(to follow someone else's design).*

*I use Git/Github for my personal projects, but I do not have much experience on working with a Of course these are personal estimates based on the time and the number of projects I have worked on.*
